From the Principal's Desk....

"The function of education is to teach one to think intensively and to think critically. Intelligence plus Character-that is the goal of true education".

The objective of education is not just to prepare for life but to be able to live it in totality. This characteristic of education makes it imperative for all educational systems to devise effective strategies and methodologies to impart quality education of head, hand and heart.

I feel privileged to communicate through 'The Fanzine Post'.
